PROFILE SUMMARY

Programming practitioner with hands-on experience in Python and SQL. Skilled in designing, developing, and maintaining software solutions, working with databases, and implementing efficient programming logic.

EDUCATIONAL QUALIFICATION

Bachelor of Science in Information Technology 2025
Pillai HOC College of Arts, Science & Commerce, University of Mumbai
CGPA: 8.85

HSC Maharashtra State Board 2021
Janta Shikshan Mandan, Alibag
Percentage: 88%

SSC Maharashtra State Board 2019
Mahatma Gandhi Vidyalaya, Alibag
Percentage: 82.60%

TECHNICAL SKILLS

Programming Languages: C, Python, SQL
Machine Learning: Supervised Learning, Regression, Classification, Scikit-learn.
Deep Learning: Convolutional Neural Network (CNN)
Databases: MySQL
Tools & Platforms: Git/ GitHub, MS Office/ MS Word, PowerPoint

---

PROJECTS

FurSaver- Website For Stray Animals
AI-powered website for early disease detection in pets and strays. Used YOLOv8 for object detection, TensorFlow-Keras CNN for disease classification, Leaflet.js for geo-tracking, and PayPal API for donations.
Tech Stack: Python, YOLOv8, CNN

Cat VS Dog Image Classification
Built an image classification system using TensorFlow/Keras CNN for cats and dogs, covering data preprocessing, model training, evaluation, and real-time predictions with accurate results on unseen images.
Tech stack: Python, TensorFlow, CNN, Image Processing
